

FREQUENTLY ASKED QUESTIONS

How much will my sno-cone machine produce?

Your sno-cone machine was engineered to shave 500 lbs. of cube or chunk ice per hour. Based on the ratio that a 1/2 lb. of ice will make a 6 oz. sno-cone, the Paragon Sno-Cone Machine will yield 1000 sno-cones per hour.

How much syrup should I use to flavor my sno-cones?

One 6 oz sno-cone will take 2 ounces of syrup – cones will not hold more than that.

Can I use block ice to make sno-cones?

You can use block ice to produce sno-cones if you first break it down into pieces 3-4 inches in size. Ice will not fit the horn if the pieces are too large.

OPERATING INSTRUCTIONS

1. Be sure equipment is connected to properly grounded 120 volt power supply with 15 amp circuit.

Shaving Ice

2. Fill the ice horn with ice.
3. Press and hold the MOTOR switch to activate blades and begin shaving ice.
4. While holding MOTOR switch down, apply steady downward pressure to the ice pusher
5. Release the MOTOR switch when finished.
6. Repeat steps 2-5 for additional batches.
